I'm Full-Stack Developer , proficient in building modern web applications utilizing ReactJS, ExpressJS, and MongoDB. Whether it's crafting a smooth user experience or wrangling data

behind the scenes, I'm passionate about creating solutions that work

and make a difference.

Technical Skills:

- Front-End: HTML, CSS, JavaScript frameworks and libraries like Reactjs, Reduxjs etc.
- Back-End: NodeJS, ExpressJS, MongoDB, RESTful APIs.
- Full-Stack: Experience building complete web applications from UI to back-end logic.
- Server-Side Rendering (SSR): Understanding and implementation of SSR for SEO and initial page load performance

Seeking:

- A challenging Full-Stack Developer role where I can utilize my skills and knowledge to build high-quality web applications.
- An opportunity to contribute to a collaborative and innovative team environment.
- A company that values continuous learning and professional development.

Professional Experience

Hotels.ng January 2023 - May 2023 Frontend Intern

- I helped in Implementing UI components and layouts as directed by designers and senior developers.
- I wrote HTML, CSS, and JavaScript codes that led to interactive and responsive web pages.
- used the Redux library to implement state management and data flow.
- Used React UI framework to build complex web applications.
- Gained practical experience with real-world development workflows and team collaboration.

Zuri.ng July 2023 - December 2023 Backend Developer Intern

- Designed and implemented RESTful APIs as needed.
- Followed API design best practices for clarity, maintainability, and security.
- Implemented API authentication and authorization mechanisms.
- Wrote unit and integration tests for API functionality.
- Learned and explored NoSQL databases for specific use cases.
- Designed and implemented database schemas, including choosing appropriate data structures and relationships.
- Developed and maintained server-side code using Node.js
- Contributed to DevOps processes like deployment and infrastructure management.

Education

Backend Engineering in Computer Science April 2022 - February 2023 Alt_School Africa, Lagos

Completed The JavaScript Algorithms and Data Structures.(FreeCodeCamp)

Completed The [Server Side Rendering with React and Redux](https://www.udemy.com/course-dashboar-d-redirect/?course_id=1383496) Course By Steven Grider On Udemy

Completed [The Complete Web Developer](https://www.udemy.com/course-dashboar-d-redirect/?course_id=1430746) Course by Andrei Neagoie on Udemy

Completed The [Complete 2023 Web Development Bootcamp](https://www.udemy.com/course-dashboar-d-redirect/?course_id=1565838) by Angela Yu on Udemy

Took [Microservices with Node JS and React](https://www.udemy.com/course-dashboar-d-redirect/?course_id=2887266) Course by Stephen Grider on Udemy

Key Skills

- HTML
- CSS
- JavaScript
- React.js
- Nodejs
- Express.js
- MongoDB
- Docker
- Kubernetes
- Python
- Soft SKills
- Active listening: Understanding colleague's ideas and concerns to effectively collaborate.
- Working effectively within teams: Sharing knowledge, respecting diverse perspectives, and contributing to collective goals.
- Adaptability and flexibility: Adjusting to changing project requirements and embracing new technologies and workflow changes.
- Creative thinking: Approaching problems from different angles and developing innovative solutions.
- Time management and organization: Prioritizing tasks, meeting deadlines, and staying organized.
